

STONE FLOOR®

Your Headache-Free Flooring Solution

THE ULTIMATE HEADACHE-FREE FLOORING.

World-Leading Thermal Stability & Performance

stonefloor.com.au

STONEFLOOR DIFFERENCE?

StoneFloor builds upon the fundamentals of Hybrid Flooring however utilises a **unique material composition** to ensure its superior and exceptional performance under the **Australian Climate**.

STONE FLOOR
Your Headache-Free Flooring Solution

VS

**Our
Competitors**

✔ StoneFloors' unique, high-quality material composition naturally gives it a substantial weight, as expected from a premium product.

✘ Most flooring utilise a lower-quality material composition, resulting in a lighter weight and cheaper feel.

✔ Near Zero Thermal Expansion & Contraction.

✘ Subject to Thermal Expansion & Contraction.

✔ 100% Waterproof.

✘ Most are Waterproof Surface only.

✔ Patented Extra-Large Locking system for enhanced dimension stability.

✘ Smaller Locking System resulting in less dimensional stability.

✔ Over 5 years of extensive real world testing in the harshest conditions. The original Solid 8mm Flooring.

✘ Many products lack real world testing and will not stand the test of time.

✔ Able to be exposed to extended periods of direct sunlight.

✘ Most flooring when exposed to extended period of direct sunlight, will void warranty and buckle.

✔ Professional Grade - can be installed floating or glued down, with a separate underlay for additional versatility and stability.

✘ DIY Grade - can only able to be installed floating and factory-produced with a combined underlay.

Is StoneFloor the same as Hybrid Flooring?

No, whilst **StoneFloor** shares around 80% of their raw material composition, it builds upon the fundamentals of Hybrid Flooring. Through utilising our **unique Australian Formula**, **StoneFloor** is made to incur **minimal expansion and contraction** under unstable environmental conditions; making it the most suitable flooring for **Australia's harsh climate and any high temperature environment**. Additionally, compared to traditional products, StoneFloor uses more environmentally friendly and only the finest limestone powder and material formulations.

LOOKING FOR THE ULTIMATE HEADACHE FREE FLOORING?

Discover the Most Suitable Flooring for the Australian Climate.

With over two decades of experience as flooring professionals, the StoneFloor team has seen many products fall short in the demanding Australian climate. If you've experienced these challenges, you're not alone. StoneFloor is engineered specifically for the Australian environment, addressing these issues head-on.

The team at StoneFloor embarked on a mission to address the most common issues with traditional flooring - such as expansion and contraction, cupping, crowning, color fading due to sunlight, water damage, and termite damage. The current generation StoneFloor, now in its third generation, features a cutting-edge patented extra-large locking technology for superior stability, combines the finest European materials and technology with our unique Australian formula, and delivers unparalleled quality, functionality, and reliability.

Choose StoneFloor and say goodbye to traditional flooring problems.

WHY CHOOSE STONEFLOOR?

BUILT TO LAST

Not many products out there can cope with the harsh Australian climate; from the roaring Summers to the frosty Winters. StoneFloor is built to excel in these conditions offering minimal expansion and contraction.

BUILT TO OUTPERFORM

StoneFloor is the culmination of 20+ Years of Industry experience and constant research and development. It has undergone extensive testing to ensure it outperforms its flooring counterparts.

IS STONEFLOOR RIGHT FOR YOU?

StoneFloor is a premium product designed to meet the needs of various environments and demographic groups. Many long-standing customers view it as long-term investment in durability and performance. Here's why StoneFloor could be perfect for you:

Homeowners with young children:

StoneFloor is 100% waterproof, making it incredibly easy to clean and maintain. Simply mop with water and detergent, and say goodbye to worries about surface stains and bacteria. StoneFloor offers natural warmth underfoot during winter and a refreshing coolness in summer, ensuring a comfortable all-year round experience.

Properties in humid areas:

Whether you live in low-lying areas, coastal regions, or high-rise units, StoneFloor is your ideal solution. Its waterproof nature, termite and ant resistance, and superior thermal stability prevent issues like color fading, expansion, contraction, crowning, and cupping.

Rental Properties and Apartments:

StoneFloor offers unmatched durability with commercial-grade wear resistance, 5-star acoustic rating, and zero maintenance hassles. Its waterproof capability and ease of cleaning makes it a long-lasting choice for landlords and homeowners alike.

Commercial properties:

StoneFloor is stain and scratch-resistant, anti-skid, fireproof, and meets all commercial standards. Its certified 5-star sound absorption rating ensures it performs excellently in high-traffic and noise-sensitive environments.

Homeowners looking for a worry free flooring:

For those seeking premium, worry-free flooring, StoneFloor is the ideal choice. Advanced technology keeps StoneFloor resilient against everyday wear, stains, scratches, and moisture, maintaining a pristine appearance over time. Enjoy luxury and complete peace of mind.

FEATURES

Superior Thermal Stability

Australia is known for its roaring Summers and strong UVs all year round, yet most products in the market are not designed for these conditions, hence resulting in all sorts of structural issues.

100% Waterproof

We know that accidents do Happen. Water spillages and leakages do occur. And flooring should be able to withstand that. That's why our products are 100% Waterproof, not water-resistant like many other products out there.

Stain and Scratch Resistance

StoneFloor is all about a head-ache free lifestyle. Heavy-duty and built to last. Built to meet both residential and commercial building standards. In addition, our special surface treatment makes it anti-skid.

Sound Absorbing

Solid 8mm thick. StoneFloor is not just tough, it excels in absorbing sound. Making it perfect for apartments. Say goodbye to strata issues and complaints.

Easy to Clean

Being 100% waterproof, cleaning and maintaining StoneFloor is a true ease. Clean with just a wet mop and keep that new look for many years to come.

Extremely Low Formaldehyde Emission

With our technologically advanced manufacturing process, StoneFloor achieves an E0 rating, ensuring it is safe for you and your family.

Completely Termite Proof

The word termite spells out a headache for any homeowner. These pests will completely destroy your property. StoneFloor itself is absolutely termite-proof.
